**KICKING PIXELS**

Essential website contact information to keep safe and to hand

Retaining a list of key contact and login details is and important part of a disaster recovery plan. It enables you to quickly contact key providers and address any issues that may arise promptly.

We recommend using a service such as LastPass or 1Password to securely store this important information in the cloud, giving you easy access to important contact & login information wherever you are.

01 Website hosting provider details

Website hosting contact

Company name

Website address

Contact telephone number

Support email address
